BERLIN, Germany. — Under the

leadership of former Secretary of State Dr. Bernhard Dernburg, the soing to arouse the city to the present evils of tenament house living and its closely-related problems of child less families.

Partly because of the tenaments, one-fourth of all marriages are now childless. Since 1890 the number of first born children has gone back by 20 per cent: the number of second born by 42 per cent: the number of third born by 60 per cent: and the number of fourth born and beyond by 70 per cent. During the same period the deaths from tuberculosis in the city averaged 20 per cent of all deaths, while in the Province of Brandenburg, in which Berlin lies, the average was only 13.4 per cent, and in East Prussla but 11.9 per cent.

In Berlin, where 77.5 per cent of the inhabitants live in teaments, only, age were fit for military service, while in Duesseldori for example, where only 20.7 per cent of the population is similarly housed, 65, per cent have been found to be physically equipped for the army and navy.

The remedy for the situation, or one feasible renady at least, the tenement reformers believe, lies with the state, which owns in the neighborhood of Berlin vast tracts of semi forest land which is of little value as such, but which could easily and advantageously be transformed into colonies of one family dwellings.

Within a radius of twelve or thirteen miles of Berlin, Prussia owns sufficient land, it is maintained, to accompdate confortably and healthfly between 250,000 and 300,000 persons in single family houses with connecting gardens, and which could be sold on easy terms to niddle class families both to their advantage and to the profit of the state.

Representative Andrews introduced a resolution to increase the pay of H. T. Mills, clerk to the judiciary committee, from \$10 to \$15 a day.
